### Fourth Quarter 2021 Operating Results

For the three months ended December 31, 2021, total investment income was \$23.6 million compared to \$15.3 million for the quarter ended December 31, 2020. This represents an effective yield on the average debt investments at cost of 15.2% and 14.5% for the periods ended December 31, 2021 and 2020, respectively. Effective yields generally include the effects of fees and income accelerations attributed to early loan repayments and other one-time events and may fluctuate quarter-to-quarter depending on the amount of prepayment activity.

Total operating expenses, excluding interest expense, for the fourth quarter of 2021 were \$6.8 million compared to \$5.7 million during the fourth quarter of 2020. The increase was primarily attributable to higher D&O insurance expense following the Company's IPO, higher compensation associated with additional headcount, variable compensation and amortization of restricted

stock grants. Interest expense for the fourth quarter of 2021 was \$6.2 million compared to \$4.3 million during the fourth quarter of 2020. The increase is primarily attributable to the higher debt outstanding under our August 2026 Notes and December 2026 Notes offset by lower average debt outstanding under our credit facilities.

Net investment income was approximately \$10.6 million, or \$0.39 per share based on 27.2 million basic weighted average shares outstanding for the fourth quarter of 2021, compared to \$5.3 million or \$0.29 per share for the fourth quarter of 2020 based on 18.3 million basic weighted average shares outstanding.

Fourth quarter 2021 net realized gains on investments were approximately \$7.5 million compared to a net realized loss of \$5.0 million during the fourth quarter of 2020.

Net unrealized appreciation was \$37.1 million during the fourth quarter of 2021, compared to net unrealized appreciation of \$9.0 million during the fourth quarter of 2020.

Fourth quarter 2021 net increase in net assets resulting from operations was \$55.1 million, or \$2.03 per share based on 27.2 million basic weighted average shares outstanding. This compares to a net increase in net assets resulting from operations of \$9.7 million or \$0.53 per share based on 18.3 million basic weighted average shares outstanding for the fourth quarter of 2020.

Trinity Capital's higher weighted average share count for the three-month period and year ended December 31, 2021 as compared to prior year is the result of approximately 8.0 million shares of common stock issued in connection with the Company's initial public offering, approximately 281,000 shares issued under the dividend reinvestment plan, approximately 36,000 shares issued in connection with the Company's ATM program and approximately 585,000 net shares issued in connection with restricted stock awards.

### Net Asset Value

As of December 31, 2021, NAV per share increased to \$16.40, compared to \$14.70 on September 30, 2021. The increase in NAV was primarily the result of the unrealized appreciation and realized gains recognized during the fourth quarter and investment income that exceeded the Company's declared dividend by \$0.03 per share. Total net assets at the end of the fourth quarter of 2021 increased by 11.9% to \$446.5 million, compared to \$399.0 million at the end of Q3 2021.

### Portfolio and Investment Activity

As of December 31, 2021, Trinity Capital's investment portfolio had an aggregate fair value of approximately \$873.5 million and was comprised of approximately \$551.9 million in secured loans, \$184.1 million in equipment financings and \$137.5 million in equity and warrants across 94 portfolio companies.

Fourth quarter investments funded totaled approximately \$197.5 million, which was comprised of \$121.0 million of investments in 11 new portfolio companies and approximately \$76.5 million of investments in 14 existing portfolio companies. The Company continues to shift its portfolio to floating rate loans with approximately 56.8% of its debt portfolio at floating rates on December 31, 2021.

Proceeds received from repayments of the Company's debt investments during the fourth quarter totaled approximately \$41.7 million, which included \$24.6 million from early debt repayments and \$17.1 million from normal amortization. In addition, the Company received \$8.3 million from the sale of equity and warrant investments primarily related to four portfolio companies. The investment portfolio increased by \$159.1 million or approximately 24.9% on a cost basis, and by \$196.2 million or approximately 29.0% at fair value as compared to September 30, 2021.

As of the end of the fourth quarter, loans to two portfolio companies were on non-accrual status with a total fair value of approximately \$5.1 million, or just 0.7% of the Company's debt investment portfolio at fair value.

The notes will mature on December 15, 2026 and may be redeemed in whole or in part at Trinity Capital's option at any time at par plus a "make-whole" premium, if applicable.
